

World Class Clampseal® Variable Tandem Blowdown Valves

Traditional bottom blowdown service requires a tandem valve. Unlike older massive designs with limited serviceability, the CLAMPSEAL unit tandem valve offers compactness, lighter weight, easy maintainability and long-life service in an economical package.

Specifications:

- Size: 1" through 2-1/2"
- Class: ANSI 1195, 2155, 3045
- End: Socket Weld, Butt Weld, Clamp Connector
- Material: Carbon Steel (SA 105)
Low Alloy (SA 182-F22)

*Thank you for your interest in doing business with Conval.
We look forward to being of service.*
